✓ EASY FOR STAFF TO USE. ZERO LIFT FOR YOUR IT DEPT.

Technology Director

" I would recommend this to a colleague who was looking for good digital signage options. Easy to navigate. Lots of options. You can seemlessly pull info from youtube, google or other sites with no hassle.. "

District IT/Communications Engineering

" For schools with multiple screens, we have them in the front office, gym, library and key entry ways. The school secretary, nurses, lunch staff, athletic departments, and clubs all use the software–and they have nothing but positive things to say. There is zero learning curve. We haven't had to do much training or support. Arreya has great training videos, so we created an internal landing page, with links, etc. Within a few hours, everyone was good to go. "
